I just think your report is so helpful as we start crafting legislation to address the problems that are surfacing now with ppt. I appreciate your recognition in the report that it's tough to quantify the amount of influence exerted by Ben, the producers, etc., but what you've captured should be so helpful for all main players - especially newer ones - as we introduce new legislation.

Those whom you've shared this with are good. Hopefully Galvin will review your information again, soon. Use your discretion and provide it with others involved in strategizing our steps towards more sensible oil tax legislation. Thanks Joe.

SP

ps. at some pt in new future the public will need to know more of the ppt background so there can be understanding of our need for new legislation. I have a feeling the FBI will be revealing more info before the special session, so their info will help our cause, but our own explanation will be necessary too. Via info in your report the public may better understand why we're doing what we're doing.

I shared it with Galvin when it was nearly complete and just recently with Marty.  Tibbles and Colberg have seen it as well.

Who else would you like me to share it with?
